- Analytics (Post Hog)
- Zod

## EXPERIENCE

### Full Stack Developer at Astern Tech (Contract Basis) [↗](#)

Role - Full Stack Lead Developer

Srinagar, Kashmir

- Implement and develop full stack projects using **Next JS, React, React Native, Trpc, React Query, Node JS, Postgres, Drizzle, Vercel, Typescript**
- Launch a Multi tenant marketing software platform
- Developed a multi-tenant marketing software with custom domain support, allowing clients to personalize their platform and align it with their brand identity.
- Lead a team, to guide development and ensure the project's completion for a client.

### Full Stack Developer at Precept Technology [↗](#)

July 2023 - August 2024

Role - Full Stack Developer

Srinagar, Kashmir

- Implement and develop full stack projects using **React, React Native, Node JS, Express JS, My Sql, Sequelize, AWS Object Storage**
- Optimised existing applications bringing .
- Launch a e-learning platform available on **App Store** and **Play Store** in 2024
- Designed a visually stunning website using React, focusing on delivering an exceptional user experience through a sleek and modern design, optimizing the app to reduce loading time by 10%.
- Developing REST APIs for seamless integration with front-end applications, enhancing data retrieval speeds by 15% .

## PROJECTS

### Aigent - Multi-Tenant Marketing, Scheduling and CRM Software | [Next.js](#), [Drizzle](#), [PostgreSQL](#), [ShadC](#)

- Developed a page builder and the ability to add custom domains to the created pages.
- Developed a multi-tenant marketing software with custom domain support, allowing clients to personalize their platform and align it with their brand identity.
- Add Google , Zoom integrations for auto generations of meeting and adding them to google calendar along with sending mails.
- Offered better user experience than other competitor software's (dayschedule)
- Led the development of key features including booking, web page builder, custom domain support, and bulk WhatsApp messaging.
- Developed a unified inbox system, similar to texts.com, for clients to manage communications across different channels.

- Integrated OAuth for secure user authentication and Razorpay for subscription management, supporting both paid and trial plans.
- Implemented PostHog for real-time analytics, enhancing customer insights and optimizing business strategies.
- Lead a team, to guide development and ensure the project's completion for a client.
- Designed and built a scalable platform with Next.js, leveraging Drizzle for handling database interactions, PostgreSQL for storage, and ShadCN for modern UI components.
- The project is finalizing and optimizing additional functionalities.

e

## **Food Delivery System with Multi-Branch Support** | Next.js, tRPC, Prisma, PostgreSQL, ShadCN, Tailwind

- Developed a scalable multi-branch food delivery system that supports dynamic branch management, order handling, and multiple integrations for payment gateways.
- Built a flexible web page builder allowing users to customize their own online stores, enhancing user experience and customization options.
- Implemented automation for efficient order processing, notifications, and customer engagement.
- Integrated multiple payment gateways for secure and seamless transactions, increasing the payment options available to users.
- Designed a robust, responsive UI with ShadCN and TailwindCSS, ensuring a modern and visually appealing interface.
- Utilized Prisma and PostgreSQL for a highly efficient and scalable backend, ensuring data consistency and performance.
- Completed major features, with ongoing improvements and optimizations.

## **2Factor.in SDK** [🔗](#) | Typescript, Javascript, Node JS , NPM , Redis , Rate Limiting , 2Fa 2024

- Developed a comprehensive Node.js and TypeScript SDK for integrating Two-Factor Authentication (2FA) via SMS OTP.
- Designed and implemented an easy-to-use SDK for integrating 2FA in applications using Node.js and TypeScript.
- Created OTP generation and validation functions with built-in phone number and OTP validation using Zod for robust data handling.
- Integrated rate limiting support using Upstash Redis to prevent abuse and ensure smooth scaling of 2FA functionality.
- Published and maintained the SDK on npm, making it easily accessible for developers looking to add secure 2FA capabilities to their apps.

## **Aidna.nz** [🔗](#) | React, Express, Node, Sequelize, MySQL 2024

- \* Crafted an innovative static website using React, , leading to enhanced portfolio visibility and attracting 20% more client inquiries within six months.
- \* Delivered an exceptional user experience with a sophisticated layout, responsive design, and intuitive navigation, resulting in a 20% increase in user engagement.
- \* Enhanced user accessibility through high-quality visuals and innovative design elements, leading to a 25% decrease in bounce rate.
- \* Showcased a website that reflects the brand's identity and appeals to its target audience.

## **Crescent Classes. E-learning Platform** [🔗](#) | React, React Native, Express, Node, Expo, Sequelize, AWS Obj

- \* Develop and design Crescent Classes, a comprehensive educational app from scratch using Node.js, Sequelize, Express, React Native, and React.
- \* Engineered fully functional iOS and Android applications, along with an admin panel and website, without relying on external front-end libraries.
- \* Ensured a seamless experience across platforms with user-friendly interfaces and robust backend infrastructure, achieving a 30% increase in user retention
- \* Available on both the Play Store and App Store, the app supports online learning with features like course management, real-time notifications, and interactive content.
- \* Tailored the app for students and educators, enhancing the online learning experience.

## **Mantis Analytica** [🔗](#) | HTML, CSS, Javascript, Gsap 2022

- \* Developed Mantisanalytica, a static website using HTML, CSS, and JavaScript within 12 days.

- \* Created unique and innovative designs, incorporating cutting-edge visual elements and engaging user interfaces.
- \* Emphasized creative and original aesthetics to deliver a memorable and distinctive online experience, leading to a 15% increase in user time spent on the site.
- \* Demonstrated a high level of design innovation and technical proficiency, reflecting a strong commitment to exceptional web experiences.

### Hotel Jamawar | HTML, CSS, Javascript, Aos

2023

- \* Built a static hotel website using HTML, CSS, and JavaScript within 3 days.
- \* Designed an elegant and user-friendly layout that effectively showcases hotel amenities, rooms, and services, contributing to a 10% increase in inquiries.

### **TECHNICAL SKILLS**

---

**Languages:** Javascript, C, C++, SQL, Typescript, Python,

**Technologies/Frameworks:** HTML5, CSS3, React, MongoDB, Express, Javascript, NodeJS, Tailwind, Prisma, Trpc, T3 Stack, Next JS, Sequelize, React Native, Git, UploadThing, Cloudinary, Drizzle, NextAuth, Zod, Post Hog, Wordpress, Woocommerce

**Developer Tools:** VS Code, PyCharm, IntelliJ, Canva, Postman, Insomnia
